+1 206 504 5536

Current Responsibility

Roger is a principal and the development director of MedInsight and related products with the Technology and Operations Solutions (TOPS) group in the Seattle office of Milliman. He joined the firm in 2004.

Professional Work Experience

Roger is the software architect for the core MedInsight software and related products. He collaborates with Milliman consultants and clients on the design and implementation of the core application.

Roger is widely recognized as an expert in his field, both at Milliman and from his 19 years of experience in the field of healthcare information technology.

His area of expertise is building technical solutions tailored to specific healthcare data analysis needs, with a focus on data warehousing as it relates to infrastructure specification and hardware design, medical claims data handling, analysis, and reporting.

Roger has extensive experience building software solutions in the following areas:

- Highly configurable and scalable database solutions
- Component and IP integration
- Financial reporting and analysis
- Clinical performance measurement, including HEDIS® and similar measurement standards.
- Pharmacy reporting
- Customization frameworks
- Provider identification and cross walking

Education

Institute of Technology, Cork City, Ireland

Affiliations

Microsoft-certified professional (#3395508) in designing and implementing databases.
