Current Responsibility

Brittany is a senior managed care pharmacist with the Milwaukee office of Milliman. She joined the firm in 2023.

Professional Work Experience

Brittany has over 10 years of experience in the specialty of managed care pharmacy. She has payor experience in the government sector, with extensive direct Medicaid experience. Brittany has expertise in formulary preferred drug list management, value based and supplemental rebate contracting, pharmacy operations, PBM and pharmacy point of sale systems, policy and legislation, and the pharmaceutical pipeline including high-cost, specialty medications.

Brittany supports payers, health plans and Medicaid programs to understand the clinical and financial aspects of policy, formulary, and coverage decisions. Specifically, Brittany devotes a significant portion of her time assessing and forecasting the landscape of emerging new cell and gene therapies and helps clients better understand opportunities to improve health care spend and clinical outcomes.

Prior to joining Milliman, Brittany completed a post graduate year one (PGY-1) managed care pharmacy residency with a government sponsored health plan specializing in Medicare and Medicaid. She also has experience working as the Preferred Drug List and Clinical Strategy Pharmacist for a state Medicaid program in the executive branch of government. There she supported a variety of work, focused on managing drug spend, pharmacy trend analysis, improving value and clinical outcomes, and ensuring evidence-based patient access to medications.
