

Ping Xiao

Actuarial Research and Development Specialist

CURRENT RESPONSIBILITY

Ping is an actuarial research and development specialist with the Property & Casualty Insurance Software (PCIS) group, based in the Atlanta office of Milliman. He is primarily responsible for the enhancement and ongoing support of the stochastic models available in the PCIS software solutions. Ping also provides significant support to the team with data manipulation and preparation on complex projects, often building custom software solutions using tools such as VBA, Excel, R, and MATLAB.

EXPERIENCE

Ping joined Milliman in 2012. His areas of expertise are in implementing stochastic reserving models, researching methodologies for stochastic reserving models, and assisting clients and staff to automate communications between Excel and Arius.

PROFESSIONAL DESIGNATIONS

Passed exams P, FM, MLC, MFE, C and CA1.

EDUCATION

- MS, Actuarial Science, Georgia State University
- MS, Risk Management and Insurance with concentration in Mathematical Risk Management, Georgia State University
- BS, Pharmaceutical Science, Sun Tat-sen University, Guangzhou, China
